2019-05-04, version v0.1c

## 1 Introduction

This package provides script named `cstanbib` which can be used for retrieving of the bibliographic information for packages hosted on CTAN.

## 2 Usage

It can be used in the following way:

```
cstanbib [options] <packagename> > filename.bib
```

The `curl` utility needs to be installed on the user's system in order to support the package info download.

## 3 Available options

**-c,--ctan** use the `@ctan` type instead of `@manual`. The difference between the two is that the `url` field contains packages CTAN path, instead of a link to the package.

**-h,--help** print the help message.

**-v,--version** print the version info.

## 4 Examples

```
cstanbib latex
```

This invocation will print data in the Bib~~La~~TeX format to the standard output:

```
@manual{latex,  
title = {The Latex package},  
subtitle = {A TeX macro package that defines LaTeX},  
author = {Lamport, Leslie and The LaTeX Team},
```

```
url = {http://www.latex-project.org/},
urldate = {2018-08-23},
date = {2018-04-01},
version = {PL 5}
}
```

The `--ctan` option:

```
ctanbib -c hyperref
```

This produces a bib record with the `@ctan` type:

```
@ctan{hyperref,
title = {The Hyperref package},
subtitle = {Extensive support for hypertext in LaTeX},
author = {Rahtz, Sebastian and Oberdiek, Heiko},
url = {/macros/latex/contrib/hyperref},
urldate = {2018-08-27},
date = {},
version = {6.86b}
}
```
