

## Sectioning commands with critical notes in parallel pages

This file provides examples for using the sectioning command with `reledpar`. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in parallel pages. Following the standard behavior of `reledpar`, only the left titles are put to the table of contents.

We use the `\reledxxx` commands, each of them in their own `\pstart . . . \pend` group.

Page breaks are manually added before chapter with `\beforeledchapter`.

# **Chapter 1**

## **Preamble**

A chapter outside any parallel typesetting environment.

## Chapter 2

# 1 Left chapter

2 I use git to manage some packages. I would like to add a pre-commit hook, to  
3 check if I have forgotten For now, I have a minimal pre-commit, which tests only the  
4 blank spaces at ends of lines, but not the forgotten.
